

Note..  
make public  
files  
for a user

Note..  
file info being:  
filepath: String  
name: String  
userID: String  
storageURL: String  
encryptionKey: String

Note..  
friendBool: boolean  
userID: String  
otherUserID: String

Note..  
need to think  
about the permissions  
are they persistent  
so long as the  
file is on the db
